3. Comparability of data

The definitions of products are, in general, uniform for all years and are identical with those employed in section C of the Quarterly Bulletin of Steel

Statistics for Europe. These definitions have been worked out by the ECE Steel Committee's Working Party on Statistics in collaboration with the Secretariat. A brochure containing the nomenclature and definitions used can be obtained from the Secretariat of the Economic Commission for Europe, Palais des Nations, Geneva.

As national and international statistics on foreign trade in steel did not in all cases distinguish between plates and sheets at 3 mm thickness, it has not always been possible to give separate information for the two products. Where possible, one-eighth of an inch has been considered as sufficiently close to 3 mm not to require further adjustment; moreover, in certain cases, all coated sheets (with the exception of tinplate, which is shown separately) have been regarded as being under 3 mm thick. In this context, attention should also be drawn to the fact that data on exports of plates and sheets from Canada and the United States are not strictly comparable with similar data for other exporting countries since strip of certain dimensions is classified either under plates or under sheets; moreover, plates and sheets exported from those two countries are distinguished at a thickness which is closer to the ECE breakdown between medium and heavy plates (4.75 mm).

4. Time period

Except in the case of Australia, all figures shown refer to the calendar year.

5. Unit of measurement

All figures are given in thousands of metric tons.

6. Sources

Most of the figures appearing in this publication have been supplied directly by the countries participating in the activities of the Steel Committee of the Economic Commission for Europe. This applies to the following countries: Austria, Belgium-Luxembourg, Czechoslovakia, the Federal Republic of Germany, France, Hungary, Italy, the Netherlands, Norway, Poland, Sweden, the United Kingdom, the United States and Yugoslavia.

In addition, full data were received from Australia, Canada, Japan and the Union of South Africa.

In the case of the USSR the data have been extracted from the national trade statistics (Vneshnyaya Torgovlya SSSR za 1964 god, Moscow, 1965).

7. Symbols employed

- = Nil (or less than half the appropriate unit).

.. = Not available.

r = Revised figures.
